Developments in technology have enabled the manufacturing of thicker and stronger porcelain pavers, such as T30, our 3cm (1¹/₈") thick porcelain paver. Because of its high load-bearing capacity, T30 offers the perfect solution for both vehicular and high-foot traffic application.

Wood style porcelain pavers and planks incorporate all the visual features that make natural wood decking so enchanting. Knots, dark and light streaks, random grain structure, pinholes, variable color and even a weathered appearance can be faithfully reproduced, in an exceptionally wide range of colors.

Porcelain avoids all the problems with natural wood decking – no decay, no attacks by insects, no fading, no color change, no staining, no twisting or warping, no scuffing, no splinters and practically zero maintenance.

Our cement look pavers expand the options of sophisticated modern styling, without the worries of staining or freeze/thaw cracking.

Additionally, porcelain is much lighter than concrete, making installation a much easier and cost-effective process.

PORCELAIN COBBLESTONE

TILES

Cobblestone tiles resemble traditional hand hewn cobbles with hammered edges, textured surface and a somewhat rustic appearance. Available in two sizes, 8" x 8" or 8" x 12" which can be combined to form several different layouts.

BLOCKS

4" x 4", 2 1/2" thick porcelain blocks replicate the look of stone cobblestones commonly seen in European city streets, pavements and alleyways. With a heavily textured surface and solid body color, these porcelain blocks are aesthetically similar to natural basalt, but much more resistant, sustainable and durable, with precise dimensions that guarantee consistent spacing of the blocks and ensure easier and more rapid installation.

basalto

grigio

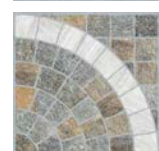

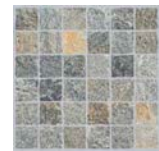

porfido

PAVERS

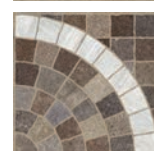

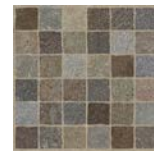

The 24" x 24" flat pavers, with their 'feet friendly' surface, ensures rapid, cost saving installation but still retains the appearance and distinctive charm of individual cobblestone blocks.
