

COBBLESTONE PAVERS

Single slab porcelain pavers replicating the look of traditional cobblestones set in multi block modules, with a regular square or fan design.

With a warm and inviting color range, excellent durability and frost resistance, these cobblestone pavers offer an exceptional alternative to clay brick or concrete block paving, particularly in shopping precincts, public plazas, pedestrian walkways or parks and gardens.

Benefits of Archatrak cobblestone pavers include:

- Rapid installation over concrete base
- Create unique patterns with fan modules
- Precise size and thickness for safe pedestrian use
- Random coloring replicating natural stone blocks
- Frost, salt and stain resistant
- Textured, slip resistant surface

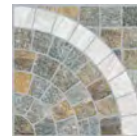

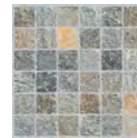

SIZE & COLOR OPTIONS

Color options below display the actual block pattern displayed on individual 24" x 24" pavers. Each color comes in 3 styles: Classic, Fan and Accented Fan. Typically intricate and difficult to lay mosaic fan patterns can easily be achieved with these pavers including both partial arcs or complete circles.

INSTALLATION

Archatrak cobblestone slab pavers used on walkways, driveways or other on-grade applications should be installed over a concrete base using mortar or other approved adhesive, followed by grouting to match the simulated grout lines on the paver body.
